Experiment 9

Aim: Create simple cards using Material UI and React. Use animations to make it more attractive

1) In components folder, add some cards from the MUI website

2) Update the *App.js* to add the cards

```
import Basiccard from './Components/Basiccard';
import PositionedSnackbar from './Components/PositionedSnackbar';
import LongTextSnackbar from './LongTextSnackbar';
tabnine: test | explain | document | ask
function App() {
  return (
    <div className="App">

        {/* <p>well ello there mate!!</p>

        <Hello1 />
        <Hello2 />
        <Props name = "Emily"/>
        <Propchild name = "Rege Jean Page"  name1 = "Simon" />
        <Propchild/>
        <Navbar />
    <Message message = "Welcome to app"/>
        <Routes>
          <Route path="/" element={<Home />} />
          <Route path="/About" element={<About />} />
          <Route path="/Contact" element={<Contact />} />
          <Route path="/Profile" element={<Profile />} />
          <Route path="/NavBar" element={<Navbar />} />
        </Routes>    */}
    <Basiccard />
    <PositionedSnackbar />
    <LongTextSnackbar />
  </div>
 );
}
```
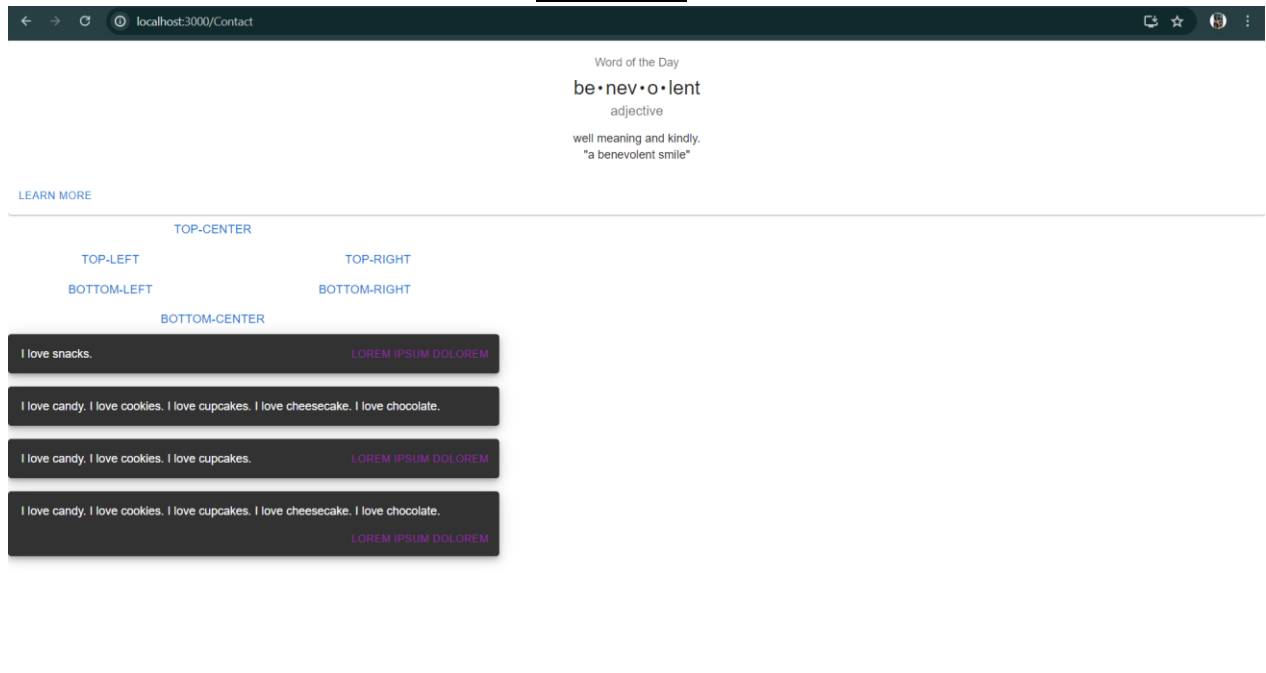

OUTPUT

Discussions:

This experiment delves into enhancing user engagement and aesthetics by employing Material-UI cards in a React application, augmenting their appeal through animated transitions and effects, thereby enriching the overall user experience.
